

Emeka Joseph Ijegalu

IT PROFESSIONAL | FULL-STACK DEVELOPER

Detail-oriented IT professional with over six years of combined experience in software development, systems administration, and data management, complemented by recently acquired OSHA and IOSH safety certifications. Skilled in building and maintaining web-based systems and databases, ensuring data integrity across IT platforms, and supporting day-to-day technical operations. Brings a strong safety-conscious mindset and a proven record of disciplined, independent work to IT support and systems roles within demanding industrial environments such as oil field services.

PROFESSIONAL EXPERIENCE

IT Support 12-2025 – Present

Azhaljack Delivery Logistics, Kuwait

- Provide day-to-day IT support across the organization, including organisation's website development and maintenance

Founder & Full-Stack Developer 2019 – Present

Lambdah Software Solutions

- Designed and deployed 12+ production web applications using Python-Flask and various frontend stacks for clients across e-commerce, NGO, and corporate sectors.
- Built and managed MySQL/phpMyAdmin databases, optimizing query performance and reducing average response times from 800ms to 120ms.
- Integrated secure payment systems (Stripe, Paystack) to support seamless online transaction processing.
- Maintained system uptime, troubleshooted technical issues, and provided ongoing IT support for live client platforms.

IT Professional 02/2023 – 05/2024

Doxa-Phos Softwares

- Managed and maintained the integrity of data and IT systems across multiple organizational development projects.
- Implemented best practices in data handling, system accuracy, and project documentation.
- Collaborated with stakeholders to translate technical and data requirements into reliable system outcomes.
- Oversaw IT project lifecycles, ensuring tasks were completed accurately and delivered on schedule.

Team Lead 01/2018 – 10/2022

Rock Hill Technologies

- Led a technical team in the development of a systems project requiring meticulous data handling and platform accuracy.
- Developed and implemented strategies to optimize system performance and operational efficiency.
- Directed research and development efforts, including gathering, processing, and analyzing large technical datasets.
